Job Slots

Reach the right candidates with the right jobs, automatically.

Why Jobs Slots are right for you

You want more of the right people to see your jobs.

Over half of job views come from candidates who aren't actively job searching. By automatically recommending your jobs to the right candidates, Job Slots help you recruit more people, faster.

You want to recruit passive as well as active candidates.

57% of passive candidates are open to considering a great opportunity. Make sure you're reaching every qualified candidate, not just those actively looking for a job.

You want to leave no stone unturned.

With more than 414M members, LinkedIn is the world's largest professional network and the best place to get your job in front of the most relevant candidates.

Get your jobs from your career site to LinkedIn, without lifting a finger.

Job wrapping lets you automatically select jobs from your ATS or careers site to post on LinkedIn, giving you more control and visibility over which jobs to promote on LinkedIn while saving you time.

How it works

Post
your job to over 400 million passive and active candidates. Swap any of your roles into the same slot, year-round.

View
all of your applicants' LinkedIn profiles. Filter applicants by location, experience level, role, and more.

Track
who's looking at your jobs, who's applying, what their skills are, and what companies they've been working with.

Candidates will see your jobs in

- Their homepage **news feed**
- Your employee **profile pages***
- Your organization's **LinkedIn Career Page***
- In the LinkedIn.com and LinkedIn Job Search **mobile** apps
- Their email **inbox**
- LinkedIn Jobs **homepage** and job **search**

* Additional fee

"At the end of the day, it's all about having access to the right people. Every time I get an applicant from LinkedIn, I am optimistic.

Tracy Heverly
Human Resources and Program Manager
Bluebeam Software, Inc.
